

COLOUR & LIGHTEN WITH CONFIDENCE

March 13th & 14th
9:00 am - 4:00 pm

Immerse yourself in a color & lightening two day hands on confidence seminar;

In colour with confidence, we dive into client diagnosis and the importance it has in achieving consistent results. We begin with a refresh on color theory and explore every aspect of hair analysis. There is a focus on how natural pigments change and affect the coloring process when working on natural or colored hair. We explore how to use Davines color lines to support desired outcomes for the client. This ensures you feel confident in the choices you make for your everyday services.

In lighten with confidence, we examine the science of lightening natural hair with The Century of Light, Alchemic, and Finest Pigments. We review color theory and hair analysis for the ideal lift. We explore how to choose the appropriate bleach to achieve the desired end-result for the client.
